

Guatemala HIV Clinic

On-screen text: CDC: Supporting HIV Treatment in Guatemala, Colectivo Amigos contra el SIDA (CAS) Clinic

Carlos Hildalgo, Social Communicator, Colectivo Amigo contra el SIDA (CAS), Guatemala: We offer health complete service to CAS. We attend amounts up to 30 MSM per day.

The CDC help us very much to CAS because we have complete tools you can give the service to the users and this is very good.

One of the things that we've been trying to do is get out the message that it's a chronic disease that it's treatable and that there is an ability to not transmit once you have viral suppression.

The thing in Guatemala alone, we still need to get 15,000 people on treatment who are living with HIV in Guatemala that are not virally suppressed. We need to be here working with them to try to find them and get them on treatment.

CDC help very much to can keep with this health service to MSM and this is very great.
